Kitchen last-order time and table availability unknown. E4 route forecast 28–35 minutes qualifies; 35–45-minute alternative route does not.

Conditions: Talad Thai is tentative; plan on the earlier 19:30 closing time (Maps says 20:00). Its route closure indicator is unresolved: check before driving. The Chef By the Sea remains the local alternative at about 18:40; use only a route within 40 min.

Timing estimate: Talad Thai about 18:00 needs departure about 17:30 for the 30 min journey. If walking Skuleberget by 14:00/off the mountain about 17:00, allow hotel changing and an 18:00 departure: Thai arrival about 18:30. The driving route stays the same. Choose to match weather and the whole group.

Nutti is outdoors and only a light-rain alternative.

Kiruna church interior and the Naturum Abisko building are closed; park outside Naturum. Turn back if canyon edges or bridges are icy.

Abisko canyon and Kungsleden loop

7.07 km · +83 m · Komoot easy · 4.77/5 (410 ratings) · 142.2 min planning time (Komoot × 1.25) · allow 143 min walking · Selected · no booking

Likely — 7.07 km · +83 m · Komoot easy · 4.77/5 (410 ratings). [Komoot route](#).

Uncertain official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 113.7 min × 1.25 = 142.2 min; use 143 min walking, plus 30 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from ICEHOTEL, Marknadsvägen 63, Jukkasjärvi: 112 km, 84 min one way, read 2 October 2026. Likely return allowance: 84 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 09:34; turn / progress check 10:46; back about 14:01. 03 Oct latest return 16:54. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Canyon water, birch woodland and meditation area; the officially described path also crosses open heath.

Uncertain snow and ice: Unsafe if canyon edges or bridge decks ice, or path/signs are obscured. Cross the open heath only in clear visibility, and follow the signed paths; if a link is unsigned or unclear, go back the way you came. In snow, allow about 171 min walking instead of 143 (Komoot's time × 1.5 instead of × 1.25), back at the hotel about 14:29; the extra time does not make icy edges or bridges safe. The shorter shore circuit only if short paths/bridges are safe; otherwise hotel/indoor alternatives. Naturum interior is closed.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⚡ [Abisko canyon and Kungsleden loop parking](#). Likely access: Public parking outside Naturum is described by Länsstyrelsen. Google lands the visitor centre (indoors closed). The Komoot route starts at Abisko Turiststation (the mountain station), a short walk from the Naturum car park; 20 min in all for car park to trail and back is an assumption.

Asian option · Arctic Thai & Grill — Kiruna · PROPOSED · conditional

★ 4.1 (1,486 reviews) · 20 min driving recorded 24 Sep · Daily 10:00–21:00 (its own page, checked 29 Sep; Google shows Wed only). · proposed 18:30

Kitchen cutoff unknown; quality below stronger-evidence guide.

Local option · Alex · PROPOSED

★ 5.0 (184 reviews) · dated 16 min driving, Sat 3 Oct 18:00 · Mon–Sat 17:30–22:30; Sun closed (its own page gives Mon–Sat 17:30–00:00, Google shows only Wed 17:30–22:30 — ring first; checked 29 Sep). · proposed 18:30

Table availability and kitchen cutoff unknown; recent reports of a full room support planning ahead, without claiming a booking requirement.

Conditions: Arctic Thai is conditional with mixed food/service reviews; 20 min drive and 21:00 close. Alex is stronger local fallback, 14 min current/16 min dated 3 October, closes 22:30 (Google shows Wed 17:30–22:30 only and its own page Mon–Sat 17:30–00:00, checked 29 Sep — ring first). The Abisko canyon hike and the actual return govern dinner.

Timing estimate: the Abisko canyon loop is back at the hotel about 14:00 (the shorter shore circuit about 12:30); + 35 min changing + 20 min drive = ready about 14:55, so 18:30 leaves ample time. The actual return is uncertain.

New restaurant evidence recorded 27 Sep 2026. Retained venue observations dated 24 Sep unless stated. Proposed timings; opening, kitchen and tables require confirmation. [Evidence and limits](#)

Conditions: Pihvipirtti is closed 27 Sep – 11 Nov 2026 (its own site; Google shows Temporarily closed; checked 29 Sep). Ravintola Asia is closed until 2 Dec 2026 (its own site; Google shows Temporarily closed; checked 29 Sep). Apart from Manan (Thai, on hold, not proposed), no Asian kitchen is confirmed open in Levi 4–6 Oct. The Ranch's restaurant is not confirmed: Visit Levi says it opens 1 Nov and its online booking shows no dinner tables before 1 Nov; its own page gives a Sep–Apr season (theranch.fi, checked 29 Sep) and mentions room service, so only the Ranch can say whether guests can eat in. Do not count on dinner at the Ranch; breakfast is included and the cabins have a kitchen. Tables not booked.

Timing estimate: Use Finnish local time after the border. The trail/ferry alternative may run later than planned; proposed Grill it! 18:30 depends on actual arrival and changing time.

Särkitunturi summit

7.04 km · +188 m · Komoot moderate · 4.85/5 (52 ratings) · 174.8 min planning time (Komoot × 1.25) · allow 175 min walking · Selected · no booking

Likely — 7.04 km · +188 m · Komoot moderate · 4.85/5 (52 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 139.9 min × 1.25 = 174.8 min; use 175 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Northern Lights Ranch, Ounasjoentie 1619, Kõngäs: 60.8 km, 48 min one way, read 2 October 2026. Likely return allowance: 48 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:53; turn / progress check 10:21; back about 13:11. 05 Oct latest return 17:29 / 06 Oct latest return 17:25. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Summit ponds and Pallas fell skyline.

Uncertain snow and ice: Official snow-free route. Clear visibility and manageable wind, no icy footing; x 1.5 does not override this restriction. Varkaankuru only if its boards are snow-free/safe; otherwise existing indoor alternatives.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Särkitunturi summit parking](#). Likely access: Särkitunturi Parking Area, Rovaniementie 1513. Official road 79 parking; Google lands directly on the car park.

Uncertain official duration scope: the 3.2 km / 2.5 h header does not clearly state one-way versus return time. Likely conservative sensitivity: 300 min walking gives return 15:16. Use the clearer, snow-free day.

Likely — 3.62 km · +84 m · Komoot moderate · 4.79/5 (38 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 62.6 min × 1.25 = 78.2 min; use 90 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Northern Lights Ranch, Ounasjoentie 1619, Kõngäs: 77.1 km, 65 min one way, read 2 October 2026. Likely return allowance: 65 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 09:10; turn / progress check 09:55; back about 12:20. 05 Oct latest return 17:29 / 06 Oct latest return 17:25. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Forested ravine, stream, small waterfalls and lush woodland.

Uncertain snow and ice: Official snow-free route with no winter maintenance. Wet/icy metal and wood decking can be unsafe. Less exposed than Särkitunturi, but not a snow fallback. Choose indoors if boards are icy, flooded or storm conditions prevail.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Varkaankuru ravine parking](#). Likely access: Official start at Kellokas visitor-centre parking, Tunturintie 54; Google lands the named centre directly.

Likely optional Kellokas visit adds 60 min, giving return about 13:20. Opening on the chosen day remains uncertain. For the optional scenic return on 6 October, the hike-day 17:25 cap requires leaving Kellokas by 14:30 (155 min drive + 20 min breaks); the road-only light cut remains separate.

Reindeer restaurant run by a local herder, Torikuja 4. It books tables only for groups over 6, so four walk in; kitchen cutoff not published.

Conditions: Pihvipirtti is closed 27 Sep – 11 Nov 2026 (its own site; Google shows Temporarily closed; checked 29 Sep). Ravintola Asia is closed until 2 Dec 2026 (its own site; Google shows Temporarily closed; checked 29 Sep). Apart from Manan (Thai, on hold, not proposed), no Asian kitchen is confirmed open in Levi 4–6 Oct. The Ranch's restaurant is not confirmed: Visit Levi says it opens 1 Nov and its online booking shows no dinner tables before 1 Nov; its own page gives a Sep–Apr season (theranch.fi, checked 29 Sep) and mentions room service, so only the Ranch can say whether guests can eat in. Do not count on dinner at the Ranch; breakfast is included and the cabins have a kitchen. Tables not booked.

Timing estimate: likely, Varkaankuru returns about 12:20, or 13:20 with a separate 60 min Kellokas visit; Särkitunturi returns about 13:11. Allow 35 min to change and 18 min to drive. The 17:25 hiking return cap is stricter than the dinner cap. The scenic return needs its separate allowance.

Juutua river and Jäniskoski loop

6.82 km · +46 m · Komoot easy · 4.53/5 (189 ratings) · 133.3 min planning time (Komoot × 1.25) · allow 240 min walking · Proposed · no booking

Likely — 6.82 km · +46 m · Komoot easy · 4.53/5 (189 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 106.6 min $\times$ 1.25 = 133.3 min; use 240 min walking, plus 30 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 41.6 km, 38 min one way, read 2 October 2026.

Likely return allowance: 38 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 10:48; back about 14:06. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Juutuanjoki, Jäniskoski rapids and forest; lowest-climb main option.

Uncertain snow and ice: Official winter maintenance does not guarantee ice-free footing. $\times$ 1.5 only if trail remains suitable; turn back on unsafe bridge/riverbank ice. Better low-level choice than Kiilopää in cloud, but storm or unsafe ice still means indoors.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Juutua river and Jäniskoski loop parking](#). Likely access: Siida public parking, Inarintie 46, explicitly an official route start. Google lands Siida. 20 min total access allowance, not measured connector.

⊕ [Juutua river and Jäniskoski loop parking](#) · [Komoot route](#)

4.08 km · +209 m · Komoot moderate · 4.90/5 (20 ratings) · 103.6 min planning time (Komoot $\times$ 1.25) · allow 104 min walking · Proposed · no booking

Likely — 4.08 km · +209 m · Komoot moderate · 4.90/5 (20 ratings). [Komoot route](#).

Verified official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 82.8 min $\times$ 1.25 = 103.6 min; use 104 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 50.5 km, 43 min one way, read 2 October 2026.

Likely return allowance: 43 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 09:40; back about 11:50. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Open Urho Kekkonen fell panorama from 546 m summit.

Uncertain snow and ice: Only clear visibility, manageable wind and snow-free/non-icy stairs for this proposal; winter snowshoe routes are a different plan. More exposed than Juutua; not the bad-weather fallback. Switch to Juutua if safe, otherwise indoors.

Verified official-page read, 2 October 2026: UKK current news read 2 Oct: no displayed Kiilopää summit closure; remote hut/fireplace/ford notices do not certify this route. Fell-centre services closed 30 Sep noon-14 Nov. Paid southern parking remains separately described. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Kiilopää summit out-and-back parking](#). Likely access: Google uniquely lands Suomen Latu Kiilopää, Kiilopääntie 620, the shared trailhead complex. Official page specifies southern public Metsähallitus lot, 45 spaces, winter maintenance; northern section is for hotel customers. Google does not uniquely identify the southern lot entrance. 10 min access allowance. Current fee notice supersedes stale free wording.

Clear visibility and safe footing only. Shorter in distance, but more exposed than Juutua. Use the summit out-and-back and retrace; no loop shortcut is assumed.

Conditions: Asian coverage gap. Petronella is not proposed: its own site lists September hours only (checked 28 Sep). Kultahippu's dated season (12 Apr–15 Nov) covers 7–9 Oct; Pirkon Pirtti gives no season end. Included Aurora Village dinner remains separate and its table must be reserved. Keep return margin for any separately arranged 21:00 activity.

Timing estimate: likely, with an 08:00 departure, Juutua returns about 14:06 using the official upper 240 min walking allowance; Kiilopää returns about 11:50. Allow 35 min to change and 8 min to drive before dinner. The selected gravel day and its reserve swap remain unchanged; use this hiking estimate only on the free day.

Thai Wok Ivalo temporarily closed; no October reopening established (Google and its Facebook page agree, checked 30 Sep). Included Aurora Village dinner remains separate.

[Gravel box \(8 Oct\)](#) — [moves here if Thursday's weather is poor](#)

9 October is the hiking day and gravel reserve. If gravel moves here, hike on 8 October instead. Juutua is the easy main option; Kiilopää is shorter but more exposed, moderate and clear-weather only.

One hiking day: Juutua loop or clear-weather Kiilopää summit out-and-back. Choose for the whole group and actual conditions.

Kiilopää fell-centre services, Kaunispää restaurant, Saariselkä spa and Ivalo swimming hall closed.

PROPOSED

Juutua river and Jäniskoski loop

6.82 km · +46 m · Komoot easy · 4.53/5 (189 ratings) · 133.3 min planning time (Komoot × 1.25) · allow 240 min walking · [Proposed · no booking](#)

Likely — 6.82 km · +46 m · Komoot easy · 4.53/5 (189 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 106.6 min × 1.25 = 133.3 min; use 240 min walking, plus 30 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 41.6 km, 38 min one way, read 2 October 2026.

Likely return allowance: 38 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 10:48; back about 14:06. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Juutuanjoki, Jäniskoski rapids and forest; lowest-climb main option.

Uncertain snow and ice: Official winter maintenance does not guarantee ice-free footing. x 1.5 only if trail remains suitable; turn back on unsafe bridge/riverbank ice. Better low-level choice than Kiilopää in cloud, but storm or unsafe ice still means indoors.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

[Aurora Village Ivalo](#) · [Juutua river and Jäniskoski loop parking](#). Likely access: Siida public parking, Inarintie 46, explicitly an official route start. Google lands Siida. 20 min total access allowance, not measured connector.

Kiilopää summit out-and-back

4.08 km · +209 m · Komoot moderate · 4.90/5 (20 ratings) · 103.6 min planning time (Komoot × 1.25) · allow 104 min walking · Proposed · no booking

Likely — 4.08 km · +209 m · Komoot moderate · 4.90/5 (20 ratings). [Komoot route](#).

Verified official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 82.8 min × 1.25 = 103.6 min; use 104 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 50.5 km, 43 min one way, read 2 October 2026.

Likely return allowance: 43 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 09:40; back about 11:50. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Open Urho Kekkonen fell panorama from 546 m summit.

Uncertain snow and ice: Only clear visibility, manageable wind and snow-free/non-icy stairs for this proposal; winter snowshoe routes are a different plan. More exposed than Juutua; not the bad-weather fallback. Switch to Juutua if safe, otherwise indoors.

Verified official-page read, 2 October 2026: UKK current news read 2 Oct: no displayed Kiilopää summit closure; remote hut/fireplace/ford notices do not certify this route. Fell-centre services closed 30 Sep noon–14 Nov. Paid southern parking remains separately described. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Kiilopää summit out-and-back parking](#). Likely access: Google uniquely lands Suomen Latu Kiilopää, Kiilopääntie 620, the shared trailhead complex. Official page specifies southern public Metsähallitus lot, 45 spaces, winter maintenance; northern section is for hotel customers. Google does not uniquely identify the southern lot entrance. 10 min access allowance. Current fee notice supersedes stale free wording.

Clear visibility and safe footing only. Shorter in distance, but more exposed than Juutua. Use the summit out-and-back and retrace; no loop shortcut is assumed.

1.69 km · +4 m · Komoot easy · 4.50/5 (4 ratings) · 32.2 min planning time (Komoot × 1.25) · allow 33 min walking · Proposed · no booking

Likely — 1.69 km · +4 m · Komoot easy · 4.50/5 (4 ratings). [Komoot route](#).

Verified official classification: Easy walking; demanding accessible classification concerns wheelchair access, not a hard hiking grade.

Likely planning allowance: Komoot 25.8 min $\times$ 1.25 = 32.2 min; use 33 min walking, plus 20 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Glass Resort, Tähtikuja 16, Rovaniemi: 18.8 km, 19 min one way, read 2 October 2026. Likely return allowance: 19 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:24; turn / progress check 08:51; back about 09:41. 12 Oct latest return 11:30. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Raudanjoki rapids, river islands and riverside woodland.

Uncertain snow and ice: No winter maintenance. Flooding or icy bridge/boardwalk surfaces can make this unsuitable; do not equate easy with ice-safe. Relaxed morning at Glass Resort if wet boards, flooding, snow or ice make the path unsafe. Preserve 12:00 ATV departure and selected-not-booked status.

Verified official-page read, 2 October 2026: Vaattunkivaara/Vikaköngäs construction is a different starting area. No Kõnkäänsaari closure notice seen; seasonal flooding and no winter maintenance remain. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⊕ [Kõnkäänsaari at Vaattunkiköngäs parking](#). Likely access: Named Google landing is Arctic Circle Hiking Area at Vaattunkikönkääntie 208. Official Vaattunki parking is at 219 on the same access road; precise bay not independently geolocated. Ten minutes total access is an assumption.

Morning only: back at Glass Resort by 11:30. The 12:00 departure for the selected 13:00 ATV remains unchanged; no booking is asserted.

Menu format may change; current kitchen cutoff and table availability unknown.

Conditions: Included Gallis dinner remains separate; table time to arrange. Wonton Soup is the first external Asian proposal about 17:30. Namu is a Korean alternative about 17:00: hours conflict, and it is tight if the kitchen closes 17:30. Roka and Nili remain local alternatives.

Timing estimate: Selected ATV at 13:00 returns about 16:10 in the plan; the former 16:30 finish does not apply. Allow 35 min changing: Wonton Soup 12 min away gives about 16:57 readiness for proposed 17:30. Namu 10 min away gives about 16:55 readiness for a tight 17:00 meal if its kitchen closes 17:30. Confirm hours before relying on either.

Verified official classification: Medium official; Komoot moderate.

Likely planning allowance: Komoot 89.5 min $\times$ 1.25 = 111.9 min; use 189 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora B. Luxury Lodge, Rukatunturintie 5, Kuusamo: 37.1 km, 38 min one way, read 2 October 2026. Likely return allowance: 38 min; future traffic uncertain.

Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Riisitunturi summit, hanging bogs, Ikkunalampi and lake views.

Uncertain snow and ice: No winter maintenance. Roots, wet paths and boardwalks can ice; fell visibility and wind are decisive. Snow multiplier does not certify suitability. Kiutaköngäs only if its steps and river-edge paths are safe; otherwise retain indoor alternatives. No rain/ice safety guarantee.

CHECKED 26 SEP

Border zone: the line passes within about 7 m of the border-zone map edge at km 1533 (Nännävaarantie) — no crossing on the map (OpenStreetMap, not official). Stay on the road; a yellow border-zone sign or a boom means turn back. Road-866 figures: carrying on from road 866 at the 12:30 cut → home ~16:50; reaching road 866 later than 12:30 → road 866 home, 74 km of tarmac, ~1.1 h. If you detour to Julma-Ölkky: the operator recommends the 14 km route via Hossa Nature Centre (rough new gravel on the highway-5 approach, notice of 4 Aug); its car park has no winter maintenance.

★ 4.5 (1,040 reviews) · 4 min walking recorded 24 Sep · Daily 13:00–21:00, kitchen closes 20:30 (its own page; Google shows Wed only; checked 30 Sep) · proposed 18:00; after optional sauna 19:45–20:00 fits (kitchen to 20:30)

Table not booked.

Conditions: Asian coverage gap. Riipisen (4 min walk) is confirmed daily 13:00–21:00, kitchen to 20:30 (its own page; Google shows Wed only; checked 30 Sep). Rukan Kuksa (8 min walk) lists September hours only (Mon–Sat 13:00–21:00, kitchen to 20:30); October not yet published. After optional 15 October sauna or separately arranged 16 October rafting, later dinner is conditional. Normal 16 October proposal is the Riisitunturi hike (Riisin räpäsäy).

Timing estimate: gravel return 15:30. Optional sauna 17:30–19:00 + 15 min return + 15 min change + 8 min walk = 19:38, so 19:30 cannot be promised. Without sauna 18:00; after sauna request 19:45–20:00 only if kitchen confirms before 21:00 closure.

No supported target-cuisine option; the audit records Thai Mali permanently closed (Google and its Facebook page agree, checked 30 Sep).

4.70 km · +119 m · Komoot moderate · 4.84/5 (92 ratings) · 111.9 min planning time (Komoot × 1.25) · allow 189 min walking · [Proposed · no booking](#)

Likely — 4.70 km · +119 m · Komoot moderate · 4.84/5 (92 ratings). [Komoot route](#).

Verified official classification: Medium official; Komoot moderate.

Likely planning allowance: Komoot 89.5 min × 1.25 = 111.9 min; use 189 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora B. Luxury Lodge, Rukatunturintie 5, Kuusamo: 37.1 km, 38 min one way, read 2 October 2026. Likely return allowance: 38 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:43; turn / progress check 10:33; back about 13:05. 14 Oct latest return 16:41 / 16 Oct latest return 16:33. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Riisitunturi summit, hanging bogs, Ikkunalampi and lake views.

Uncertain snow and ice: No winter maintenance. Roots, wet paths and boardwalks can ice; fell visibility and wind are decisive. Snow multiplier does not certify suitability. Kiutaköngäs only if its steps and river-edge paths are safe; otherwise retain indoor alternatives. No rain/ice safety guarantee.

Verified official-page read, 2 October 2026: Official current notice: paid parking from 1 Sep 2026 to spring 2027. No route closure displayed in the captured status page. [Official trail and status](#). Future conditions uncertain; recheck before departure.

[Riisin räätäpy parking](#). Likely access: Direct Riisitunturi parking POI. Google Details follows road 9471 then 2.9 km Riisitunturintie, consistent with official last 3 km access. Official warns general park navigation can be wrong; use this named parking link. Paid parking.

Likely — 2.11 km · +17 m · Komoot easy · 4.33/5 (3 ratings). [Komoot route](#).

Verified official classification: Easy official and Komoot.

Likely planning allowance: Komoot 33.2 min × 1.25 = 41.6 min; use 60 min walking, plus 20 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora B. Luxury Lodge, Rukatunturintie 5, Kuusamo: 32.4 km, 28 min one way, read 2 October 2026. Likely return allowance: 28 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:33; turn / progress check 09:13; back about 10:26. 14 Oct latest return 16:41 / 16 Oct latest return 16:33. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return car, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Oulanka rapids against the dolomite wall.

Uncertain snow and ice: No winter maintenance. Ground stairs, rocks and river-edge surfaces can ice. Stay on path and away from slippery edge. Indoor day if steps/boards/rocks ice. Ordinary rain alone does not establish a safe river-edge route.

Verified official-page read, 2 October 2026: Official trail description and Oulanka current page read today; no Kiutaköngäs closure displayed. Pinned page says visitor-centre interior closed after 26 Sep; parking does not imply indoor services. [Official trail and status](#). Future conditions uncertain; recheck before departure.

K1 · 254 KM ON TRAIL · 37 TARMAC · 24 GRAVEL · 193 NO RECORD

LINE

- 6 km to FIN-04 km 988, south 254 km — Juntinvaara tower (949), Ruunaa rapids (745) — to km 734, 8 km from Lieksa
- then round the south of Pielinen: road 73, the Ahveninen bridge, road 6, 504 and 5040 — 104.5 km (no ferry, no ice road in October)
- fuel Lentiira / Kuhmo, Lieksa

G0

- At Kiviekieintie, km 933 (56 km in), later than ~09:00 or with the line looking doubtful → cut: road 9121, Kuhmo, Nurmes, road 6 — ~220 km, ~3.4 h of driving from the cut plus stops (09:00 → ~12:25, ~13:25 with an hour of stops; later at Kiviekieintie is later at Koli).
- Decide here — the two stretches car routers will not follow (km 933–928 and 908–898) come next; a router avoiding them is not proof they are closed
- fallback if the 17th ran long: FIN-01 past Kuhmo to Nurmes on the line, road 6 to Koli, in ~14:25.

CHECKED 26 SEP

Map check 26 Sep: the two stretches car routers avoid (km 933–928 and 908–898, incl. Vasamantie) are mapped with a dirt surface, the roughest track grade and as Kuhmo's permit-controlled snowmobile route — car access unconfirmed; a snowmobile permit is not car permission. About 600 m of the line runs on the edge of the border-zone map. At 25 km/h on the gravel instead of 35, the full line would end around 19:10, after dark. The road is the plan; decide at Kivikiekintie (km 933).

Harju Trail from Lusto

5.95 km · +28 m · Komoot easy · 4.44/5 (18 ratings) · 114.9 min planning time (Komoot × 1.25) · allow 179 min walking · Proposed · no booking

Likely — 5.95 km · +28 m · Komoot easy · 4.44/5 (18 ratings). [Komoot route](#).

Verified official classification: Official Medium overrides Komoot easy.

Likely planning allowance: Komoot 91.9 min × 1.25 = 114.9 min; use 179 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Kuru Resort, Kuruntie 22, Rantasalmi: 80.2 km, 70 min one way, read 2 October 2026. Likely return allowance: 70 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 09:15; turn / progress check 11:00; back about 13:59. 22 Oct latest return 16:32. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Lake views on both sides of the Punkaharju esker and pine woodland.

Uncertain snow and ice: No winter maintenance. Steps and esker slopes may ice; take care at road crossings. Snow factor is sensitivity only. Retain existing indoor alternatives; Lusto visit and castle loop need their own added timing. Do not append both automatically.

Verified official-page read, 2 October 2026: Official Punkaharju current page and trail read today; no current Harjureitti closure displayed. This is an absence of notice, not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⚡ [Harju Trail from Lusto parking](#). Likely access: Direct Lusto museum landing; official car page identifies Lusto parking. Ten minutes total joining allowance. Museum opening is a separate question; hike does not depend on museum entry.

Alternative on 22 October only, replacing the selected, not-booked Linnansaari boat outing if chosen. No boat plus hike combination. Lusto, lunch and castle visits are separate and excluded from this outing total.

Kitchen cutoff and explicit security/access rules absent from Maps; walking route and station location support public-area access, not a security guarantee.

Conditions: All options conditional after the planned 19:10 arrival of LH 805 (still to book), baggage and hotel check-in. Taxi 16/18 min to Indian/Vietnamese; 6 min walk Thong Thai public access unresolved. Indian closes 22:30; others 22:00. Saravanaa has a review-removal notice and service complaints. No rental vehicle assumed.

Timing estimate: LH 805 has a planned 19:10 arrival and remains unbooked; bags/check-in then 16 min taxi make 20:45–21:00 only a conditional estimate. Saravanaa closes 22:30; others 22:00. No vehicle after return.

TRAIL ALTERNATIVES

SWEDEN 28 SEP – 2 OCT · FINLAND 4 – 18 OCT · PAVED IS THE PLAN · GRAVEL IS THE OPTION · CHOSEN AT DEPARTURE

Adam, 10 and 17 Sep: on every driving day from Sundsvall on, the paved route is the plan on the card and the TET line is an **alternative**, decided on the morning — first the three Swedish transfer days on S-07, S-07 + S-06 and S-16 and the saved S-06 line from the gate to Arvidsjaur on 1 Oct, gravel first (857 km of trail, measured from *Sweden TET.gpx*, 137,747 track points), then the eight Finnish ones. Kilometres from the 2026 *Finland TET.gpx* and *Sweden TET.gpx*, summed point to point — floors where the file is drawn coarsely; road links from Google Maps (fastest route, 10–11 Sep 2026; the 1 Oct roads from OSRM, 23–24 Sep). Hours at 35 km/h on recorded gravel or unrecorded track and 65 on recorded tarmac, + 1 h of stops, from first light — surfaces from Trafikverket NVDB and Digiroad, sampled about every kilometre on 22–23 Sep (the 8, 13, 15 and 17 Oct lines on 24 Sep) — up to ~6 km apart where the GPX is drawn coarsely, so since v1.30 each sample counts for the stretch around it: of the 2,208 km of line, ~637 km reads paved, ~1,040 km gravel, ~531 km with no record. The road plans' hours are driving time with no stop allowance (the road-leg convention); add an hour before comparing. Full working: *analysis/Surface_Verification_v1.2.md*, *analysis/TET_Eastern_Corridor_v1.6.md* (Sweden), *analysis/TET_Finland_Legs_v2.2.md* and *analysis/Map_Verification_v1.6.md*; the Swedish switch: *analysis/Paved_First_Sweden_v1.0.md*.

all twelve taken

2,208 km Sweden 857 km (the 1 Oct line's 224 among them), Finland 1,351 km (the 8, 11 and 15 Oct lines' 123, 191 and 197 among them) — ~637 km recorded paved, ~1,040 km recorded gravel, ~531 km with no record; Koli → Rantasalmi on 21 Oct has no line worth the detour; the ICEHOTEL → Levi Pallas piece and the Levi loop are on the base cards; the Ivalo, Rovaniemi and Ruka lines are the 8, 11 and 15 Oct base days

Fuel on the Swedish lines, in order: Timrå · Viksjö · Mjällom · Ullånger · Skorped · Trehörningsjö · Norrfors · (Rödåsel, on the Vindeln extension only) · Lycksele and Arvidsjaur on the road · Moskosel · Vidsel · Nattavaara (8 km off) · Hakkas. Longest gaps on the line: Viksjö → Mjällom 109 km on 28 Sep, Norrfors → the Granö turn-off 75 km on the 29th. Nothing exceeds a tank; fill at Ullånger (before the hotel road to Docksta), Granö or Lycksele, and Arvidsjaur regardless.

TURN-BACK RULE, on any trail day taken. If by midday the trail is running slow — surface worse than expected, a section closed, a vehicle in trouble — drop to the road for the rest of the day: the E4 shadows S-07 and the southern S-06 from Härnösand to Umeå, road 363 and the E12 from Granö, road 97 from Harads. On 2 October do not hesitate: two paid nights at ICEHOTEL are waiting, and the road via Gällivare is the surest way in.

On the sealed legs, light is not the constraint — distance is; even the shortest day gives close to 11 h between first and last light. On the trail days nothing is assumed about pace, which is why they start at first light and carry a turn-back rule.

The S-06 line, 1 Oct — the gravel day (selected: the saved S-06 route, S-06 km 452 → 228 — 224.1 km by the file, 224 in the roadbook — driven reversed, gravel first; estimates: routing, the GPX and Trafikverket road register, 22–24 Sep). 11 km of road to the gate at km 228 (~6 km gravel), then the line south-west: Vidsel (km 281, fuel), Storforsen (km 294, on the line — ~30 min at the rapids inside the hour of stops, the only visit; the Döda fallet walk, 1.4 km, is not in it; the old "5 km off at km 260" was wrong), Moskosel (km 372, fuel), Arvidsjaur (km 452, lunch, fuel) — then 175 km home by 94, Älvsbyn, 356, BD 683 and 97 (road register 166 samples, 155 paved, 11 gravel). 224 km of trail (~15 tarmac · ~208 gravel · ~1 no record), 410 km in all, ~225 km of it recorded gravel; driving ~9.3 h + 1 h of stops, 06:30

→ ~16:50, last light 18:56. Exits (routed and sampled 24 Sep): Moskosel later than ~11:45 → home by E45 · 374 · BD 668 · BD 682 · 97, 127 km, ~45 gravel, ~2.6 h — or E45 to Arvidsjaur (55 km, ~4 gravel) and the tarmac home, ~3.7 h; Vidsel → home 54 km, ~42 gravel, ~1.4 h. The shorter way home from Arvidsjaur, BD 660 · 668 · 682, is 141 km with ~47 km of gravel — the same ~2.8 h. Corrected 24 Sep: v 1.24's late exit, "Moskosel → E45 · 374 · Älvsbyn home on tarmac, 206 km", had never been surface-sampled. Set aside on 23 Sep: the S-06 + S-16 loop of v 1.18 (220 km, ~155 gravel, 7.4 h) and the other sampled shapes considered previously. Storforsen (Länsstyrelsen Norrbotten, 23 Sep): a large car park, ploughed in winter; toilets, a shelter and fireplaces listed; "däckspång leder ut mot forsen" — the boardwalk to the rapids; "branta stup ... klipphällarna kan vara hala när de är våta" — cliffs, slippery rock when wet; no fishing, fires only at the fireplaces; a fee is not mentioned. Hotell Storforsen (storforsen.se, 29 Sep): lunch buffet every day 12–14, SEK 152 — the line now passes at ~08:35, before it opens; à la carte Mon–Sat 18–21:30, Sun 17–19:30, booking required. lansstyrelsen.se storforsen.se

MAIN: Abisko canyon and Kungsleden loop · **SELECTED** · **NO BOOKING**

SHORTER: Abisko canyon and Torneträsk shore · **PROPOSED** · **NO BOOKING**

POOR WEATHER: Poor weather: ICEHOTEL 365 (if skipped on 2 Oct, 11–18) + the Jukkasjärvi church interior (09–15) · ice-sculpting session SEK 795 (**ENQUIRY** at the desk). In a storm, stay at the hotel · **PROPOSED** · **NO BOOKING**

The driving route stays the same. Choose to match weather and the whole group.

Abisko canyon and Kungsleden loop

Likely — 7.07 km · +83 m · Komoot easy · 4.77/5 (410 ratings). [Komoot route](#).

Uncertain official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 113.7 min × 1.25 = 142.2 min; use 143 min walking, plus 30 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from ICEHOTEL, Marknadsvägen 63, Jukkasjärvi: 112 km, 84 min one way, read 2 October 2026.

Likely return allowance: 84 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 09:34; turn / progress check 10:46; back about 14:01. 03 Oct latest return 16:54. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Canyon water, birch woodland and meditation area; the officially described path also crosses open heath.

Uncertain snow and ice: Unsafe if canyon edges or bridge decks ice, or path/signs are obscured. Cross the open heath only in clear visibility, and follow the signed paths; if a link is unsigned or unclear, go back the way you came. In snow, allow about 171 min walking instead of 143 (Komoot's time × 1.5 instead of × 1.25), back at the hotel about 14:29; the extra time does not make icy edges or bridges safe. The shorter shore circuit only if short paths/bridges are safe; otherwise hotel/indoor alternatives. Naturum interior is closed.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⚡ [Abisko canyon and Kungsleden loop parking](#). Likely access: Public parking outside Naturum is described by Länsstyrelsen. Google lands the visitor centre (indoors closed). The Komoot route starts at Abisko Turiststation (the mountain station), a short walk from the Naturum car park; 20 min in all for car park to trail and back is an assumption.

Abisko canyon and Torneträsk shore

Likely — 2.95 km · +40 m · Komoot easy · 4.63/5 (30 ratings). [Komoot route](#).

Uncertain official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 48.0 min × 1.25 = 60.0 min; use 60 min walking, plus 20 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from ICEHOTEL, Marknadsvägen 63, Jukkasjärvi: 112 km, 84 min one way, read 2 October 2026.

Likely return allowance: 84 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 09:34; turn / progress check 10:04; back about 12:28. 03 Oct latest return 16:54. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Canyon and Torneträsk shore with substantially less walking than the canyon and Kungsleden loop.

Uncertain snow and ice: Bridge decks, rock and shoreline may ice; no current field condition report. Not a storm fallback. Reject unsafe shore wind or slippery canyon paths. Stay on the signed canyon and shore paths; do not take unsigned links.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

Särkitunturi summit

Likely — 7.04 km · +188 m · Komoot moderate · 4.85/5 (52 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 139.9 min × 1.25 = 174.8 min; use 175 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Northern Lights Ranch, Ounasjoentie 1619, Kõngäs: 60.8 km, 48 min one way, read 2 October 2026. Likely return allowance: 48 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:53; turn / progress check 10:21; back about 13:11. 05 Oct latest return 17:29 / 06 Oct latest return 17:25. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Summit ponds and Pallas fell skyline.

Uncertain snow and ice: Official snow-free route. Clear visibility and manageable wind, no icy footing; x 1.5 does not override this restriction. Varkaankuru only if its boards are snow-free/safe; otherwise existing indoor alternatives.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

📍 [Särkitunturi summit parking](#). Likely access: Särkitunturi Parking Area, Rovaniementie 1513. Official road 79 parking; Google lands directly on the car park.

Uncertain official duration scope: the 3.2 km / 2.5 h header does not clearly state one-way versus return time. Likely conservative sensitivity: 300 min walking gives return 15:16. Use the clearer, snow-free day.

Varkaankuru ravine

Likely — 3.62 km · +84 m · Komoot moderate · 4.79/5 (38 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 62.6 min × 1.25 = 78.2 min; use 90 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Northern Lights Ranch, Ounasjoentie 1619, Kängäs: 77.1 km, 65 min one way, read 2 October 2026. Likely return allowance: 65 min; future traffic uncertain.

At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Forested ravine, stream, small waterfalls and lush woodland.

Uncertain snow and ice: Official snow-free route with no winter maintenance. Wet/icy metal and wood decking can be unsafe. Less exposed than Särkitunturi, but not a snow fallback. Choose indoors if boards are icy, flooded or storm conditions prevail.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

[Varkaankuru ravine parking](#). Likely access: Official start at Kellokas visitor-centre parking, Tunturintie 54; Google lands the named centre directly.

Likely optional Kellokas visit adds 60 min, giving return about 13:20. Opening on the chosen day remains uncertain. For the optional scenic return on 6 October, the hike-day 17:25 cap requires leaving Kellokas by 14:30 (155 min drive + 20 min breaks); the road-only light cut remains separate.

Kiilopää summit out-and-back

Likely — 4.08 km · +209 m · Komoot moderate · 4.90/5 (20 ratings). [Komoot route](#).

Verified official classification: No explicit full-route grade established in captured official pages

Likely planning allowance: Komoot 82.8 min × 1.25 = 103.6 min; use 104 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 50.5 km, 43 min one way, read 2 October 2026. Likely return allowance: 43 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 09:40; back about 11:50. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Open Urho Kekkonen fell panorama from 546 m summit.

Uncertain snow and ice: Only clear visibility, manageable wind and snow-free/non-icy stairs for this proposal; winter snowshoe routes are a different plan. More exposed than Juutua; not the bad-weather fallback. Switch to Juutua if safe, otherwise indoors.

Verified official-page read, 2 October 2026: UKK current news read 2 Oct: no displayed Kiilopää summit closure; remote hut/fireplace/ford notices do not certify this route. Fell-centre services closed 30 Sep noon-14 Nov. Paid southern parking remains separately described. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⚡ [Kiilopää summit out-and-back parking](#). Likely access: Google uniquely lands Suomen Latu Kiilopää, Kiilopääntie 620, the shared trailhead complex. Official page specifies southern public Metsähallitus lot, 45 spaces, winter maintenance; northern section is for hotel customers. Google does not uniquely identify the southern lot entrance. 10 min access allowance. Current fee notice supersedes stale free wording. Clear visibility and safe footing only. Shorter in distance, but more exposed than Juutua. Use the summit out-and-back and retrace; no loop shortcut is assumed.

Juutua river and Jäniskoski loop

Likely — 6.82 km · +46 m · Komoot easy · 4.53/5 (189 ratings). [Komoot route](#).

Verified official classification: Easy

Likely planning allowance: Komoot 106.6 min × 1.25 = 133.3 min; use 240 min walking, plus 30 min stops and 20 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora Village Ivalo, Aurorakuja 38: 41.6 km, 38 min one way, read 2 October 2026. Likely return allowance: 38 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:48; turn / progress check 10:48; back about 14:06. 08 Oct latest return 17:03 / 09 Oct latest return 16:59. At stated clock: on out-and-back descend even if summit not reached; on loop, if less than halfway around intended walking route, retrace the known outward route. Earlier retreat if conditions deteriorate. No extension into unfamiliar terrain.

Likely view: Juutuanjoki, Jäniskoski rapids and forest; lowest-climb main option.

Uncertain snow and ice: Official winter maintenance does not guarantee ice-free footing. x 1.5 only if trail remains suitable; turn back on unsafe bridge/riverbank ice. Better low-level choice than Kiilopää in cloud, but storm or unsafe ice still means indoors.

Verified official-page read, 2 October 2026: Official description/status read today. No route closure was displayed in these captured pages; absence of a notice is not an all-clear. [Official trail and status](#). Future conditions uncertain; recheck before departure.

⚡ [Juutua river and Jäniskoski loop parking](#). Likely access: Siida public parking, Inarintie 46, explicitly an official route start. Google lands Siida. 20 min total access allowance, not measured connector.

The FIN-07 line north of Inari, Thu 8 Oct — the gravel day (selected, in place of the old Vuotso FIN-01 loop; estimates — routing, the GPX and road register, 24 Sep). 41 km of road 4 to Inari; the line from the Siida door (km 667) west on Angelintie (road 9553; the first ~26 km tarmac, ~3 km of it no record) to Angeli (km 728) and north along the Inarijoki — the Norwegian border river — to Karigasniemi (km 790); home by roads 92 and 4, 139 km (tarmac, ~2 km no record). 123 km of trail (~35 tarmac · ~81 gravel · ~7 no record), 304 km in all; driving ~5.8 h + 1 h of stops, 08:00 → ~14:55, last light 19:01; an hour at Siida on the way home (last tickets 16:15) → ~15:55. Way off: at Angeli later than ~13:00 → back the way you came, 103 km (~33 gravel), ~2.0 h. Road condition: drivers' forum reports 2006–2021 disagree, washboard to fairly good — look at the road 9553 camera ↗ the night before; gates mapped in OSM within ~60 m of the line near km 686, 757, 767, 783 and 786 — on the road or not, open or locked: unknown. Fuel Inari, Karigasniemi. Not the border zone — that is Inari's Russian side. Replaced: the old Vuotso loop, FIN-01 east of the E75 south of Vuotso and back — 88 km of trail after ~105 km of road, 6.6 h.

1.69 km · +4 m · Komoot easy · 4.50/5 (4 ratings) · 32.2 min planning time (Komoot × 1.25) · allow 33 min walking · Proposed · no booking

Likely — 1.69 km · +4 m · Komoot easy · 4.50/5 (4 ratings). [Komoot route](#).

Verified official classification: Easy walking; demanding accessible classification concerns wheelchair access, not a hard hiking grade.

Likely planning allowance: Komoot 25.8 min × 1.25 = 32.2 min; use 33 min walking, plus 20 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Glass Resort, Tähtikuja 16, Rovaniemi: 18.8 km, 19 min one way, read 2 October 2026. Likely return allowance: 19 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:24; turn / progress check 08:51; back about 09:41. 12 Oct latest return 11:30. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Raudanjoki rapids, river islands and riverside woodland.

Uncertain snow and ice: No winter maintenance. Flooding or icy bridge/boardwalk surfaces can make this unsuitable; do not equate easy with ice-safe. Relaxed morning at Glass Resort if wet boards, flooding, snow or ice make the path unsafe. Preserve 12:00 ATV departure and selected-not-booked status.

Verified official-page read, 2 October 2026: Vaattunkivaara/Vikaköngäs construction is a different starting area. No Köncäänsaari closure notice seen; seasonal flooding and no winter maintenance remain. [Official trail and status](#). Future conditions uncertain; recheck before departure.

📍 Köncäänsaari at Vaattunkiköngäs parking. Likely access: Named Google landing is Arctic Circle Hiking Area at Vaattunkiköncääntie 208. Official Vaattunki parking is at 219 on the same access road; precise bay not independently geolocated. Ten minutes total access is an assumption.

Morning only: back at Glass Resort by 11:30. The 12:00 departure for the selected 13:00 ATV remains unchanged; no booking is asserted.

The FIN-07 line, Sun 11 Oct — the gravel day (selected: the line that was the 10 Oct trail alternative, driven whole as a day from the base, gravel first; estimates — routing, the GPX and road register, 22–24 Sep). 4 km of road 81 to FIN-07 km 277, then the line north with its numbering: Ounasvaara (km ~280 — the first ~13 km read tarmac; no record from about km 290, recorded gravel from about km 302), east of Meltaus (km 344), Kierinki (km 409, fuel), to km 468 on road 80 — then 179 km of tarmac home by roads 80, 79 and 934, 161 of 161 samples paved. 191 km of trail (~38 tarmac · ~50 gravel · ~103 no record), 374 km in all — ~50 km of it recorded gravel, ~103 km with no record; driving ~7.8 h + 1 h of stops, 07:30 → ~16:20, last light 18:58. Exits: at Kierinki later than 12:30 (plan ~11:00) → home from there, 116 km by Kieringintie, 952 and 934 — ~88 km paved, ~27 km gravel, ~2.1 h of driving from Kierinki (leave at 12:30 → ~14:40); Meltaus (km 344) → home 69 km, ~12 km gravel or unrecorded. An older instruction gave the Kierinki exit as "road 79, 115 km" — it is roads 952 and 934 with gravel. The day replaces the old Kierinki loop (the northern half, 133 km of line); the ATV moves to Monday 13:00. Use the distances and cut rules above; the older escape instruction is superseded.

Likely — 4.70 km · +119 m · Komoot moderate · 4.84/5 (92 ratings). [Komoot route](#).

Verified official classification: Medium official; Komoot moderate.

Likely planning allowance: Komoot 89.5 min × 1.25 = 111.9 min; use 189 min walking, plus 30 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora B. Luxury Lodge, Rukatunturintie 5, Kuusamo: 37.1 km, 38 min one way, read 2 October 2026. Likely return allowance: 38 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:43; turn / progress check 10:33; back about 13:05. 14 Oct latest return 16:41 / 16 Oct latest return 16:33. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Riisitunturi summit, hanging bogs, Ikkunalampi and lake views.

Uncertain snow and ice: No winter maintenance. Roots, wet paths and boardwalks can ice; fell visibility and wind are decisive. Snow multiplier does not certify suitability. Kiutaköngäs only if its steps and river-edge paths are safe; otherwise retain indoor alternatives. No rain/ice safety guarantee.

Verified official-page read, 2 October 2026: Official current notice: paid parking from 1 Sep 2026 to spring 2027. No route closure displayed in the captured status page. [Official trail and status](#). Future conditions uncertain; recheck before departure.

2.11 km · +17 m · Komoot easy · 4.33/5 (3 ratings) · 41.6 min planning time (Komoot × 1.25) · allow 60 min walking · Proposed · no booking

Likely — 2.11 km · +17 m · Komoot easy · 4.33/5 (3 ratings). [Komoot route](#).

Verified official classification: Easy official and Komoot.

Likely planning allowance: Komoot 33.2 min × 1.25 = 41.6 min; use 60 min walking, plus 20 min stops and 10 min access. The multiplier is a planning assumption, not measured October pace.

Verified source observation — Google drive from Aurora B. Luxury Lodge, Rukatunturintie 5, Kuusamo: 32.4 km, 28 min one way, read 2 October 2026. Likely return allowance: 28 min; future traffic uncertain.

Likely schedule: leave 08:00; start walking 08:33; turn / progress check 09:13; back about 10:26. 14 Oct latest return 16:41 / 16 Oct latest return 16:33. Progress check is an early retreat gate, not scenic-point arrival. On out-and-back, retrace then if necessary; on loop, if less than halfway and unable to meet return cap, retrace known safe way. Turn earlier for deteriorating conditions; do not improvise a shortcut.

Likely view: Oulanka rapids against the dolomite wall.

Uncertain snow and ice: No winter maintenance. Ground stairs, rocks and river-edge surfaces can ice. Stay on path and away from slippery edge. Indoor day if steps/boards/rocks ice. Ordinary rain alone does not establish a safe river-edge route.

Verified official-page read, 2 October 2026: Official trail description and Oulanka current page read today; no Kiutaköngäs closure displayed. Pinned page says visitor-centre interior closed after 26 Sep; parking does not imply indoor services. [Official trail and status](#).

Future conditions uncertain; recheck before departure.

[⊕ Kiutaköngäs parking](#). Likely access: Google lands Oulanka Visitor Center. Official car access confirms visitor-centre parking. Ten minutes total access to Komoot start is an assumption.

PROPOSED · **NO BOOKING** — Harju Trail from Lusto. Komoot 5.95 km, 28 m ascent, easy; 91.9 min × 1.25 = 114.9 min, a planning assumption. Allow 179 min walking plus 30 min stops and the recorded drives/access. 22 Oct leave 08:00, progress check 11:00, back 13:59 (latest 16:32). Lake views on both sides of the Punkaharju esker and pine woodland. No winter maintenance. Steps and esker slopes may ice; take care at road crossings. Snow factor is sensitivity only. Retain existing indoor alternatives; Lusto visit and castle loop need their own added timing. Do not append both automatically. Conditions and status checked 2 Oct 2026; recheck before departure. Lusto remains an optional separate museum visit; its prior hours/price are retained elsewhere. Museum, lunch and castle visits are not included in this hike total; adding them needs a fresh outing sum. Retained separate museum/lunch observations: Lusto Tue–Sun 10–17, adults 18 € · lunch at Lusto's restaurant Kuhankeittäjä, Tue–Fri 11–16 (lunch 11–15, 18.60 €) · restaurant (ravintolakuhankeittaja.fi, checked 30 Sep; Google shows Wed only) · Lusto checked 28 Sep · a full day, not a shorter plan These visits are not included in the hike sum; any combined outing requires a new calculation.

METHOD AND EVIDENCE

Verified means transcribed from the pinned source, not a new field check. Likely marks an estimate or proposal; uncertain marks unresolved conditions. Sources: Activities Choice Menu v1.1; Restaurant Shortlist v1.1 and its recorded 24 September Google Maps evidence; Restaurant Shortlist v1.2 (ChatGPT, 27 Sep) and Claude's verification of it (web check 27 Sep); the v1.31 baseline for carried facts. Per-entry observation dates and qualifications remain authoritative. A stay booking does not establish an activity booking or dinner sitting. Name-search links do not establish exact navigation destinations.

Seen on the operator's own page or booking calendar on 23 Sep — price, hours or an open date for our day. Still re-check the week before: seasons slip.

Operator page, but not confirmed for our date — the season or the day was not checked, or the information is from the 7 Sep run. Confirm before counting on it.

No reachable source — the site was down or unreadable; the thing may well exist. Ask locally.

Closed or not running on our dates, stated by the operator.

Finnish local time is one hour ahead of Sweden during the trip; at the border move watches one hour forward. Carry a headlamp per person; aim to be off trails an hour before last light.

Kitchen last order not published; an 18:30 meal leaves about 90 min.

Conditions: Granö Beckasin serves dinner Mon–Sat 17:00–20:30 (the lodge's own page, checked 28 Sep); book a table in advance and quote the room booking number. Restaurant Wild River is not an option: this autumn it serves only Thu–Sat (its booking page, checked 28 Sep). No Asian restaurant within the 40-min ceiling; the nearest are Aylia Sushi Bar, Vännäs (41 min) and Blue Ocean Sushi, Lycksele (44 min), both Tue 11:00–20:00 (checked 28 Sep).

Timing estimate: the trail alternative arrives ~15:40, the road plan ~12:40; on-site 18:30 fits the 17:00–20:30 service once a table is booked. Optional 3–4 h dusk moose safari conflicts and requires rearranging dinner.

Tittis Thai permanently closed; no Asian dinner within the 40-min ceiling. Granö Beckasin serves dinner Mon–Sat 17:00–20:30 (checked 28 Sep).

A planning overview, not route weather: one Open-Meteo request (its best-match model) for the fourteen villages, made when the page is opened or brought back with a connection and the saved answer is more than an hour old, or when the stamp above is tapped. The answer is kept on this device, so with no signal the page shows the last forecast it saw, with its age; older than a day it is dimmed. **High / low** are the warmest and coldest hours of that calendar day at the village point (the low usually falls before dawn); **precip** is the day's total as water, snow separately as fallen depth; wind is the day's strongest, gusts beside it. The point is the village or resort centre — Ruka, Levi and Koli figures are the settlement, not the fell top. **This page carries no warnings.** The official page for each place — SMHI in Sweden, FMI in Finland — is linked in the last column and on every card; check it when there is signal. The station records below are the baseline (up to thirty Septembers and Octobers, sample sizes on the table); the forecast is what the next two weeks look like.

How to read it. Day / Night are mean daily maximum and minimum. The **1-in-10 night** is the 10th-percentile minimum — one night in ten is at least that cold, so expect about three over 29 nights, in runs. **Stay met ≤ −5** is the share of past years in which a stay on these exact dates included a night at or below −5 °C. **Rain → freeze** is ≥ 1 mm on a day above 0 °C followed by a night at or below 0 °C — the black-ice set-up, an upper bound not an ice count. **Snow yrs** is the share of years with snow on the ground at the station on at least one morning of the stay (Kiruna's series has a 1994–2021 gap; Sorsele has nine years). **Gust p90** is the 90th-percentile daily peak gust, ERA5 valley grid — summits are windier. **Light** is civil dawn to civil dusk on the mid-date.

THE FELL TOPS

SUMMIT STATIONS · TEMPERATURE ONLY

HIKE	SUMMIT STATION	DAY	NIGHT	1-IN-10 NIGHT	NIGHTS ≤ 0	DAYS NEVER ABOVE 0	RECORD LOW
Levi	Muonio Sammaltunturi, 565 m · 35 km from Levi	3.4	−0.1	−4.3	51 %	17 %	−6.5 (2009)
Saariselkä	Kaunisää, ~430 m · above the trailheads	3.1	−0.7	−5.2	60 %	21 %	−9.4 (2009)
Ruka	Rukatunturi, ~490 m · the Ruka summit	1.6	−1.6	−5.4	71 %	39 %	−11.6 (2002)
Koli	no summit station — nearest series is Lieksa Lampela, 27 km away and lower; forecast-only	—	—	—	—	—	—

Summits run −1.4 to −2.9 °C colder than their valley by day and about the same at night — what they add is wind and cloud. Rukatunturi stays

below zero all day on 39 % of days in the window; Kaunispää on 21 %.

WIND CHILL AND FROSTBITE

ENVIRONMENT CANADA INDEX

On a 1-in-10 night with that day's gust, the index from Jukkasjärvi onward runs **−8.7 to −13.6** — Environment Canada's **moderate** band (−10 to −27: hypothermia and frostbite risk if outdoors for long periods without adequate protection). Nothing in thirty years of records reaches the **high** band (−28 and below, where exposed skin freezes in 10–30 minutes); the nearest is a summit scenario at about −24.2 at Ruka. Frostbite needs air below 0 °C — it is a summit-in-wind problem here; what arrives first everywhere is **numb hands**, and the wet-cold band every base sits in is where hypothermia actually happens (CDC: possible above 4 °C when wet).

Fell-hike ladder — forecast summit wind chill: ≤ -10 → shorten, add layers, hard turnaround · ≤ -18 → valley walk instead · ≤ -28 → no exposed ground. The −10 and −18 steps are our own; −28 is the cited band.

RULES FROM THE NUMBERS

ANY ONE TRIGGER → THE SAFER OPTION · PROPOSALS, NOT AUTHORITY

DECISION	TRIGGER — ANY ONE	SAFER ACTION
Trail day vs the road every trail option — the alternatives on 28 · 29 Sep and 2 · 4 · 7 · 13 · 17 · 18 Oct, the base-day lines on 1 · 8 · 11 · 15 Oct · decide the evening before, re-check at departure	rain today and tonight's forecast minimum ≤ 0 °C · ≥ 10 mm in 24 h or ≥ 20 mm in 72 h · rain forecast for the trail hours · snow forecast on the route · any SMHI or FMI warning · standing water or deep ruts at the entry · no forecast received and acknowledged before departure	an alternative: the day's road plan, on its card · a base-day line: a day at the base, or the card's way off
Fell hike vs valley walk	forecast summit wind chill ≤ -10 · forecast summit gusts ≥ 20 m/s · fresh snow ≥ 5 cm · cloud on the summit at departure · a start leaving less than 1.5 × the planned time to the top before the turnaround	see the ladder above; any other trigger → valley walk
Camping vs lodge vs vehicle	forecast minimum below −5 °C · overnight rain with minima near zero · gusts ≥ 15 m/s · any bag without a −10 °C <i>comfort</i> rating (ISO 23537)	lodge; if none reachable, sleep in the vehicles with the engine-heat routine and the −10 °C bags, re-plan the next leg
Long transit 17 and 24 Oct	freezing overnight after a wet day · any FMI warning on the route · fog or snow forecast	add 30 % to the drive time; on 24 Oct stay nearer the ferry the night before rather than leave earlier in the dark; most experienced driver on the first, dark hour
Aurora watch	forecast minimum ≤ -5 °C or gust ≥ 10 m/s	stand-still kit, 30-minute stints, buddy check, return time set — clear aurora nights are the coldest and set up the morning ice

Turnaround on the fells: **start descending by sunset – 2 h** (Levi 16:29, Saariselkä 16:04, Ruka 15:36, Koli 15:34) and **be off the exposed top by sunset – 1 h** (17:29, 17:04, 16:36, 16:34). Two headtorches per person regardless. Drivers: the experienced pair take every icy, dark or recovery-prone section; learners drive gravel and easy sections in daylight and dry conditions with an experienced co-driver beside them.

IF IT GOES WRONG

SOURCED WHERE MARKED · OTHERWISE PRACTICE

- **Wet cold, not deep cold, is the threat.** Warning signs (CDC): shivering, exhaustion, confusion, fumbling hands, slurred speech, drowsiness. Action: shelter, wet clothes off, warm the core under dry layers, warm non-alcoholic drink only if fully conscious, handle gently, medical help as soon as possible. With signal, **112**; without, the satellite messenger SOS at the *same* moment — rescue in Lapland is hours away. The messenger needs a clear view of the sky: move to a clearing if a message will not send.

- **Black ice.** Wet afternoon, clearing sky, still cold night → glazed road at first light that looks merely damp. Most frequent set-up at Ruka, Saariselkä and Koli. A trail alternative, if taken, starts at first light and the 24 Oct ferry drive starts before it. Speed and following distance are the controls (Liikenneturva).
- **Stuck overnight (NWS):** stay in the vehicle; run the engine about 10 minutes each hour, window cracked, exhaust cleared of snow; dome light on at night, bright cloth on the door, bonnet up when the snow stops. Keep **above half a tank** on remote sections so that routine lasts two nights; a battery CO alarm per vehicle. Convoy: the second vehicle stops short of a soft patch and assesses before following — two vehicles are the recovery plan only until both are stuck.
- **Animals (Liikenneturva):** elk move an hour either side of dusk and dawn, September–November — the same hours as the ice and, from mid-October, the same hours you drive. Reindeer everywhere in Lapland, in herds. Slow down on unlit roads, never swerve, 112 after any collision.
- **Trail-day snow:** none of the three stations has recorded snow on the ground in the window in its observed years — Ullånger 15, Granö 21, Harads 16 (short series; read as uncommon, not never) — a 06:00 valley reading that says nothing about daytime showers or higher forest roads. Frost on 35–43 % of nights and a wet day on 28–34 % of days. The likely trail hazard is **mud, ruts and standing water after rain**, then frozen puddles and glazed shade at dawn.

Contingency

EMERGENCY · SWEDEN AND FINLAND

112

Police, ambulance, fire, sea and mountain rescue. Free, from any phone on any available network — with or without your own SIM.

It needs a signal. Long stretches of trail between Sundsvall and Hakkas have no mobile coverage. Do not assume you can call for help on the gravel days.

NO-SIGNAL PROTOCOL

- **Satellite messenger or PLB, one per vehicle.** On every trail option (the alternatives on 28 · 29 Sep and 2 · 4 · 7 · 13 · 17 · 18 Oct, and the base-day lines on 1 · 8 · 11 · 15 Oct, as listed in the Weather rules) it is the only reliable way to raise anyone; mobile coverage on those lines is not established here.
- **Do not count on texting 112.** In Sweden, SMS 112 is only for pre-registered deaf, hearing- or speech-impaired users with a Swedish SIM; in Finland, a 112 text reaches the centre only from a Finnish number, and anyone who can hear and speak is asked to call.
 - **Call 112** — free; without your own network the phone normally connects through another operator, though it can take longer; if it will not connect, **restart the phone or take the SIM out** (switch an eSIM line off) and call again.
 - **Always be ready to say where you are:** location from a foreign SIM is not guaranteed, and in Finland an iPhone on a foreign SIM sends none.
 - **Before Finland, set up the 112 Suomi app** (your number with the + country code) and **call from inside it:** it sends your position when it has a connection and otherwise shows coordinates to read aloud (degrees and decimal minutes — say so).
 - **iPhone satellite SOS does not work** in Sweden or Finland.
 - **Keep VoLTE / Wi-Fi calling switched on.**

Checked 27 Sep 2026: sosalarm.se, 112.fi, PTS, Traficom, Apple.
- **Radios and an agreed channel** at the start of each gravel leg. Phones are not a convoy tool.
- **Lost contact:** the lead stops at the next junction and waits 15 min; the trailing vehicle **stops where it is** and does not backtrack. If still apart after 15 min, the lead backtracks to the last agreed rendezvous. Radio check every 30 min; never press on hoping to meet.

TRAIL ALTERNATIVES · THE RULES

28 SEP – 18 OCT · IF A TRAIL DAY IS TAKEN

- **Sweden, 28 Sep – 2 Oct: paved is the plan, gravel is the option** (Adam, 17 Sep). The four cards carry the E4 · E12 · 97 · E10 plans — 116 · 153 · 351 · 279 km, 1.9 · 2.6 · 5.5 · 4.8 h, leaving 12:00 · 10:00 · 09:30 · 10:00 — and the S-07, S-07 + S-06 and S-16 lines as alternatives with their own bars, timelines and cut rules; the S-06 line is not an alternative but **the 1 Oct gravel day from Treehotel**, driven from the gate to Arvidsjaur, gravel first, a base day with no bed to reach (Adam, 24 Sep) — 857 km of trail line in all, ~211 km of it reads tarmac in NVDB, ~642 gravel, ~4 unrecorded. The choice is made at breakfast; the beds are booked either way.
- **A Swedish trail alternative departs at first light — 06:30; the Finnish ones at 07:00–07:15, as on their cards.** At 35 km/h on gravel the long second day, the 29th, needs every minute of it: a check-in window that closes at 21:00, no mobile coverage for most of the way, and a surface nobody has confirmed — **the early start is the whole margin** for a puncture, a washout, or driving on when a bed falls through. Tell the hotel which plan you are on when you give the arrival time.
- **Distances are measured from the GPX; hours are 35 km/h on recorded gravel and 65 on recorded tarmac** (an hour of stops, 06:30 start) — Adam's planning figures. The GPX carries no surface data, so the surface comes from Trafikverket's NVDB and Finland's Digiroad, sampled about every kilometre along every line on 22–24 Sep (*analysis/Surface_Verification_v1.2.md*) — up to ~6 km apart where the GPX is drawn coarsely, so each sample counts for the stretch around it (v1.30); unrecorded stretches are timed at the gravel speed but not counted as gravel. S-07 on the 28th is about half tarmac; S-16 is four-fifths gravel, S-06 nine-tenths. The Swedish alternatives come out at ~6.8, ~9.1 and ~7.6 h; the 1 Oct line at ~10.3 h from 06:30 with an hour of stops (Storforsen ~30 min inside it — the only visit), gravel first; the cut at Moskosel is on the card. The 28th is the calibration — if the real average is under 35, take the road on the 29th.
- **All three trail beds are booked** (10 Sep; the 28th moved to Docksta on the 16th) — Elite Plaza Hotel, Örnköldsvik on the 28th (Docksta Hotell cancelled on the day) and Granö Beckasin on the 29th, which wants an arrival time; Treehotel on the 30th, **non-refundable, SEK 16,600**, check-in until 22:00. If a trail day is ending short of its bed, ring the hotel from the last town with signal and finish on the road — a no-show costs the night, and the road reaches all three. The Treehotel night and the Icehotel arrival are the two worth protecting.
- **Finland, 4–18 Oct: the same rule** (Adam, 10 Sep). Five alternatives sit on the cards with their own bars, timelines and cut rules — A' · B · D · H7 · K1, 840 km of trail line, of which ~327 km reads tarmac and ~192 km gravel in Digiroad and ~321 km has no record — and the choice is made at departure. Three lines are not alternatives but base-day gravel days with no bed to reach (Adam, 24 Sep): FIN-07 north of Inari on Thu 8 Oct (123 km), the FIN-07 line from Glass Resort on 11 Oct (191 km) and the FIN-01 border line from the Ruka lodge on Thu 15 Oct (197 km). K1 on the 18th is now the long day (~9.5 h); on K1 the margin falls on tarmac, not on the trail. First light is 07:00–07:15 by then and last light 18:20–19:00.
- **Lentiira, 17 Oct** — booked for two adults in one chalet: extra beds or a second chalet for four, linen and towels ×4 (or pack them), and dinner, all to be arranged with the property in advance; the kitchen there is limited. Koli's new confirmation (18–21 Oct) shows one adult per room — re-correct to four.
- **Decide by mid-afternoon, not at dusk.** Last light ~19:00 and falling a few minutes a day. Arriving in the dark near freezing, on gravel, is a different job from arriving at 17:00.
- **Ring ahead from the last town with signal.** Granö's check-in window ends at 21:00 and Treehotel's at 22:00, and both confirmations ask for an expected arrival time; Granö's restaurant serves dinner Mon–Sat 17:00–20:30: book a table for four in advance, quoting the room booking number (checked 28 Sep). Numbers on each leg and in the lodging manifest.
- **Expect frost.** Station records for the three bases (1996–2025): Ullånger 28–29 Sep night 2.4 °C, frost 35 % of nights, one night in ten –2.9; Granö 29–30 Sep night 3.0, frost 22 %, one in ten –1.5; Harads 30 Sep–1 Oct night 0.9, frost 43 %, one in ten –4.3 — coldest night in the Harads window –9.8 (2009). Plan for –5 °C, not 0.
- **Check the sleeping bags before the Stockholm hotel handover; time and arrangement unconfirmed.** A +5 °C bag is not a –5 °C bag, and the difference arrives at 03:00.
- **Allemansrätten** permits a night or two on undeveloped land, away from homes and in nobody's way. It does not permit driving off-road to reach a spot.

WILDLIFE

THE MAIN ROAD HAZARD IN LAPLAND

- **Moose and reindeer, at first and last light** — exactly when the trail days start. Slow down on unlit sections; a moose is dark, tall and does not reflect headlights.
- **Never swerve.** Brake hard in a straight line. A swerve into a ditch or a tree is the worse outcome.
- **A collision with moose, reindeer or deer must be reported** — call [112](#) in both countries and mark the spot. Reindeer are somebody's property.

CONDITIONS

STATION RECORDS · SEE WEATHER TAB

- **Trail bases (Ullånger/Docksta, Granö, Harads):** run 10 Sep. Ullånger 28–29 Sep: day 11.1 / night 2.4 °C, frost 35 % (inland station, 141 m — the village will run milder); Granö 29–30 Sep: day 9.9 / night 3.0, frost 22 %; Harads 30 Sep–1 Oct: day 8.4 / night 0.9, frost 43 %, rain-then-freeze set-up on 11 % of days. No snow on the ground recorded in any of the three windows (15–21 years of record).
- **Jukkasjärvi, 1–4 Oct:** day 6.0 / night 0.2 °C; frost 48 % of nights; the stay met a frost in 76 % of past years and a night ≤ -5 °C in 24 %; snow on the ground in 50 % of years (record 33 cm, 1966).
- **No polar night.** The first sunless day at Kiruna's latitude is 11 December.

PRE-GRAVEL CHECKS

- **Tyres — settled. Both vehicles on winter tyres.** Not legally required until 1 Nov (FI) and 1 Dec (SE), so this is ahead of the statute rather than because of it.
- **Fuel.** Top up at every station on the gravel days — the fuel towns are named on each trail card, from the TET file. Rural pumps are often **unmanned, card-only automats**: carry two different chip-and-PIN cards. **Tank range on gravel and whether jerrycans are carried: confirm with Ronny.**
- **Recovery.** Rated recovery points, strap, shackles, traction boards, shovel, compressor — to be verified at the Stockholm hotel handover, with someone who knows how to use them; time and arrangement unconfirmed.
- **Tyres, second line.** Plug kit and valve tool per vehicle; confirm each has a full-size spare. **A vehicle without a serviceable spare drops to the sealed route.** Tyre service towns on or near the line: Härnösand, Umeå, Arvidsjaur, Gällivare — not checked.
- **Satellite messengers — confirmed?** One per vehicle, registered, tested before Sundsvall. Without them the trail days are a no-go.
- **Cold-camp minimum per vehicle** — sleep system rated below zero, two days' food and water, headtorches, first-aid kit. Check alongside the tent at the Stockholm hotel handover; time and arrangement unconfirmed.
- **If a vehicle stops:** get off the carriageway, hazards on, warm layers on, then call — [112](#) for injury, Ronny for the vehicle. Share position as decimal coordinates from the map app.

WHAT GIVES WAY TO WHAT

When two things conflict: **safety and road conditions first · the ferry and the flights second · the three non-refundable arrivals third · the trail fourth · everything under Things to do last.** Every rule on this page follows from that order.

If not settled at the 27 Sep handover, ask Ronny which edition and which sections his unit carries, and load the 2026 file on your own device regardless.
- **Northern trail passability, late September.** Unverified. Contingency route under *Distance*.

- **LH 805, Stockholm → Frankfurt, 25 October, 16:55 → 19:10** — chosen 10 Sep, **to book soon** (business, four, US\$1,673 total on the Google Flights quote). The ferry docks 06:10 and the vehicles go back first; at Arlanda by ~15:00. Alternative on the card: the 12:40 → 14:55 (US\$1,810) — only if Ronny confirms an early Sunday handover.
- **Handover time on 27 Sep, and where the vehicles go back on 25 Oct** — both Sundays. The pickup point is now the Stockholm hotel, Ett Hem (Adam, 21 Sep) — as of 26 Sep, Ronny still needed the address and the handover arrangement was unconfirmed; the return point is not yet agreed (the 43 km Värtahamnen → Arlanda run is in the leg table). If not settled at the 27 Sep handover, ask Ronny: the recovery equipment and the 25 Oct return point and time. The first day is still timed off an assumed 08:00 handover.
